

Shipping and Delivery Policy

TechMart Electronics | Document domain: product

Delivery Speeds and Charges

Standard delivery costs INR 49 and takes 3 to 6 business days. It is free on orders above INR 999. Express delivery costs INR 149 and takes 1 to 2 business days. Same-day delivery costs INR 249, is available in Pune, Mumbai, Bengaluru, and Gurugram only, and requires the order to be placed before 12:00 IST.

TechMart Premium members receive free next-day delivery on every order with no minimum value.

Serviceability

We deliver to 19,400 pincodes across India. Enter your pincode on the product page to check serviceability and the expected delivery date. We do not currently ship outside India.

Large appliances are delivered only to pincodes with an installation partner. Delivery and installation are scheduled together and installation happens within 48 hours of delivery.

Tracking

A tracking link and AWB (Airway Bill) number are emailed and sent by SMS when the order ships. Tracking data can take up to 12 hours after dispatch to appear on the courier's system - a link that shows 'no information' on the first day is normal and not a lost shipment.

Our courier partners are Blue Dart for express, Delhivery for standard, and Porter for same-day.

Delivery Attempts and Failures

Couriers make three delivery attempts on consecutive days. After three failed attempts, the shipment is returned to origin (RTO) and refunded automatically within 7 business days of reaching the warehouse.

For orders above INR 25,000, an OTP sent to your registered mobile number is required at the doorstep. Delivery cannot be completed without it.

If a package arrives visibly damaged or with a tampered seal, refuse the delivery. If you have already accepted it, report it within 48 hours with unboxing photographs, otherwise a damage claim cannot be filed with the courier.

Delays

Delivery estimates exclude Sundays and national holidays. Delays commonly occur during festival sale periods (Diwali, Republic Day sale) and due to weather disruptions or local restrictions, which are outside our control.

If a shipment shows no tracking movement for 5 consecutive business days, it is treated as a lost shipment. We will either dispatch a replacement or issue a full refund, at your choice, within 3 business days of the investigation being raised.
